

## Multi-Polar Magnet

Research shows that electrical pollution is killing us. Power lines, air wave communication, fluorescent lights, computers - even hair dryers - are affecting our health and energy. Every cell in our body has a negative and positive side. The potentially harmful electromagnetic field caused by electricity interferes with our own energy field and nervous system. People who work in front of computers or under florescent lights often experience weakness, headaches, or feeling ill because of this electromagnetic pollution.

Test for yourself. Stand up and put your arm straight out in front of you. Have someone push down on your arm and see how strong it is. Then turn on a hand held dryer and hold it next to your body. Or stand close in front of a computer or television that is turned on and test. You'll probably find your arm becomes completely weak. This is what is happening to us day in and day out because of these electric alternating currents.

Even though we cannot do away with all of these abnormal bombardments, we can protect ourselves. A simple multi-polar magnet, no bigger than a credit card, energizes our energy field, protecting us. Just try it. Put this card in your shirt pocket. Now re-test with the hair dryer near you or while in front of a computer or television. You'll see yourself stay stronger. You may also have more energy and generally feel better with continual use.

We recommend people wear this all the time they are working with computers, etc. Our preference is to wear it all day long, everyday. Other practical recommendations are to:

- Use a headset or earpiece with cell phones
- Do not use electric blankets or heating pads
- Stay as far away from outside electric poles and transformers
- Stay at least 3 feet away from electrical devices like TV's, radio, video, bedside clocks, and microwaves
- Unplug water beds when you go to sleep

These have also been used for pain reduction by placing them over the painful area and leaving it until the pain lessens or leaves. If it doesn't help originally, move it to the exact same place on the opposite side of the body. This has to do with the acupuncture meridians of the body. Many times this simple magnet relieves chronic pain like headaches, carpal tunnel, tennis elbow, strained muscles, bruises, arthritis, old injuries, back pain, or spinal problems.

Some of the above conditions are caused by frequent electro-magnetic bombardments where our energy field weakens or becomes irritated, allowing symptoms, etc. Have you ever wondered why the old manual typewriters didn't cause carpal tunnel and the new easy to push electric computer keyboards are causing so many problems? The most common surgery in the industry is for carpal tunnel syndrome.

The earth is a giant magnet with a north and south pole. Researchers tell us it previously was 4 gauss (a unit of magnetic strength). Now the earth's magnetic influence is only ½ gauss according to some researchers due to atomic booms, etc. We are 1 gauss, and therefore, are literally being drained. There exists with life's electromagnetic energy in our bodies, a delicate balance. William Philpott, M.D., also a Clinical Ecologist and a Psychiatrist, in his book, "New Hope For Physical and Emotional Illness", states many human diseases and discomforts are an imbalance of the north pole and south pole energy in each cell.

When the north pole energy is weakened, the arterial blood becomes more acidic. The normal pH of the arterial blood is 7.40+-.05. Viruses, parasites, and other pathogenic organisms proliferate or grow in an acidic environment. North pole magnetic energy raises the pH of the blood, making it more alkaline, thus possibly eliminating or reducing the overgrowth of disease causing organisms. Philpott has demonstrated that our energy field is our first line of defense even before our immune system. So it is very important to preserve or upgrade our energy field to protect us.

You may have heard of a multi-level company promoting magnetic beds, etc. The multi-polar magnets we offer work on the same principle, yet are much less expensive. This little magnetic is placed cloth side against your body. It takes only one card. Place it in the pocket of your shirt or pants or some ladies even place it in their bra

to have it next to their body. Most people wear it all day. Some feel they need more energy and find placing several under their beds, (the mattress pad) helps them at night.

These magnets are available at Gorman Optimal Health Solutions, Inc. for \$20 plus shipping. To order a multi-polar magnet, call 215-9-HEALTH or send an email to [Giovanna@GormanOptimalHealth.com](mailto:Giovanna@GormanOptimalHealth.com).
