Release For Care & Insurance:

I hereby authorize this office and its doctors to administer care to myself or my dependent(s) as they deem necessary. I clearly understand and agree that I am personally responsible for payment of all fees charged by this office. I understand the above information and guarantee this form was completed correctly to the best of my knowledge and understand it is my responsibility and duty to inform this office of any future changes in medical status including any accidents, injuries, falls, etc.

I hereby authorize assignment of my insurance rights and benefits directly to the provider for services rendered. I acknowledge that the filing of my insurance is done as a courtesy by the provider and does not release me of my obligation to pay for services. I also authorize the provider the release information required to process the insurance claims. I authorize the use of my signature on all insurance submissions. This is to serve as a long term authorization. It may be revoked in writing.

This flow chart gives the doctor a visual way of seeing what is bothering you. Please fill out anything you can.

What is bothering you? (list only one symptom per column)

1

Mark an X where this symptom is:

Name this symptom: _____

When did symptom start?

How did it start?

How frequently does it bother you?
 Constant Daily Weekly
 Monthly Intermitted
 Erratic Other _____

What makes it better?
 (example: certain time of day,
 position, medication, ice/heat,
 etc)

What makes it worse?
 (example: certain time of day,
 position, activities, etc.)

How are your day-to-day activi-
 ties affected by this symptom?

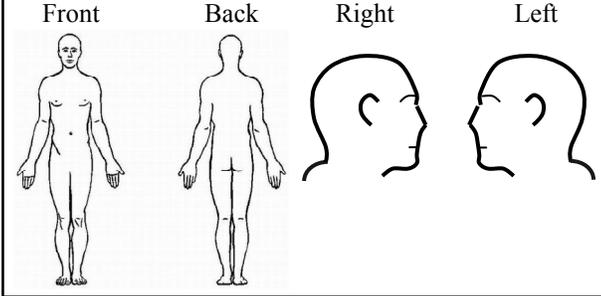

Notes: _____

On a 1-10 scale, what low end/high end range does your symptom bother you?

1 2 3 4 5 6 7 8 9 10

2

 ties affected by this symptom?

Notes: _____

On a 1-10 scale, what low end/high end range does your symptom bother you?

1 2 3 4 5 6 7 8 9 10

What does it feel like?
 Sharp Shooting
 Dull Aching
 Numb Tingling
 Burning Stiffness
 Other _____

Does it Radiate down arms
 or legs ?

Since onset, symptoms have:
 Increased
 Decreased
 Remained the same
 Erratic
 Other _____

What store bought or home
 remedies have you tried?

Effect? _____

Other professional care: _____

Same or similar condition in
 the past? _____

What does it feel like?

INFORMED CONSENT

PATIENT NAME: _____ ID: _____

To the patient: Please read this entire document prior to signing it. It is important that you understand the information contained in this document. Please ask questions before you sign if there is anything that is unclear.

The nature of the chiropractic adjustment:

The primary treatment used is spinal manipulative therapy. I may use my hands or a mechanical instrument to move your joints. That may cause an audible “pop” or “click,” much as you have experienced when you “crack” your knuckles. You may feel a sense of movement.

Analysis / Examination / Treatment:

As a part of the analysis, examination, and treatment, you are consenting to the following procedures:

spinal manipulative therapy	hot/cold therapy
range of motion testing	vital signs
muscle strength testing	basic neurological testing
palpation	EMS
orthopedic testing	ultrasound
postural analysis	radiographic studies

As with any healthcare procedure, there are certain complications that may arise during chiropractic manipulation and therapy. Some patients will feel some stiffness and soreness following the first few days of treatment. I will make every reasonable effort during the examination to screen for contraindications to care; however, if you have a condition that would otherwise not come to my attention, it is your responsibility to inform me.

Complications to treatment may include but are not limited to: muscle strain, cervical myelopathy, costovertebral strains and separations, ultrasound burns, disc complications, dislocations, and fractures. Dislocations or fractures are rare occurrences and generally result from some underlying weakness of the bone, which I check for during the taking of your history and during examination and x-ray. Incidences of stroke are exceedingly rare and are estimated to occur between one in one million and one in five million cervical adjustments. The other complications are also generally described as rare.

Other treatment options for your condition may include:

- Self-administered, over-the-counter analgesics and rest
- Medical care and prescription drugs such as anti-inflammatory, muscle relaxants and pain-killers
- Hospitalization
- Surgery

If you chose to use one of the above noted “other treatment” options, you should be aware that there are risks and benefits of such options and you may wish to discuss these with your primary medical physician.

The risks and dangers attendant to remaining untreated:

Remaining untreated may allow the formation of adhesions and reduce mobility, which may set up a pain reaction further reducing mobility and leading to progressing degenerative disc disease and nerve dysfunction. Over time this process may complicate treatment making it more difficult and less effective the longer it is postponed.

DO NOT SIGN UNTIL YOU HAVE READ AND UNDERSTAND THE ABOVE. PLEASE CHECK THE APPROPRIATE BLOCK AND SIGN BELOW

I understand the above explanation of the chiropractic adjustment and related treatment. I understand that I am always free to ask any additional questions that I may have. By signing below I state that I have weighed the risks involved in undergoing treatment and have decided that it is in my best interest to undergo the treatment recommended. Having been informed of the risks, I hereby give my consent to that treatment.
